Capt. Peterson,	Lytton City,
L. P. Fisher,	San Francisco,
F. Algar,	Clement's Lane, London,
G. Street,	London,

W. M. Murray informs the Territorial *Enterprise* that about two miles south-east of Dayton (Chinatown) there is a formation of sandstone, on the southern end of the coal fields, with thirteen prints or footmarks of an animal, whose species is now supposed to be extinct. The footprints measure fourteen inches in length. Those who pretend to know, say it resembles the track of a large moose. The geological formation indicates that the prints were made more than a thousand years ago. Mr. Sterling, of that place, is having the marks excavated from their bed to be sent to the World's Fair in London.

CURIOS AMMUNITION.—The rebel Col. Smith, commanding the Confederate troops of peninsular Virginia, ran away when Gov. Dix issued his proclamation, with all the Confederate money within his reach. It seems, however, that he "bagged" the money in his own interest, and started with it for Canada. The rebels of the peninsula were very short of ammunition. At one battery a mixed collection was found, including cobble stones, iron candlesticks, broken bits of machinery, and a general museum of varieties, sewed up in canvas. One of the guns had been burst, probably by the use of such missiles.

SHOCKING SIGHT.—An incident has been related, representing that when the Seventy-ninth landed at Port Royal, the first sight which greeted them on entering the hospital was a man seated at a table, with a splendid case of surgical instruments before him, his left arm resting naturally upon the table, and the position of his body indicating perfect ease; but upon a closer observation it was discovered that the entire upper portion of his head had been cut away from the crown to the back of his neck by a cannon ball.

ARCHBISHOP HUGHES' SECRET MISSION.—The arrival of Archbishop Hughes in London is announced. He reached that city on the 21st day of November, and went to Paris the next day. During his brief stay in London, as the *Tablet* informs us, he visited several influential personages. The same journal adds that the purpose of his visit to Europe is not known. We learn, however, upon very good authority, that the country to which Mr. Seward has really given him a secret mission is Spain. There, it is presumed, and apparently not without reason, he will be able to exercise a considerable influence over men in power.

The other night, Mr. Madegan, residing in Euclid, Ohio, awoke with a sense of suffocation, and discovered that during his sleep he had swallowed a partial set of teeth, with the gold plate to which they were attached. The plate is crescent shaped, hooked at each end, and having three teeth set at irregular intervals on it. Eventually it got into his stomach, and caused such excruciating pain that he went to the city Saturday morning and put himself under Dr. Strong's care. The case is one of great difficulty.

A barbarous attempt at murder took place at La Guerche, France. A young wife attempted to kill her husband by pouring melted lead into his ear while he slept, and during the paroxysm of pain which ensued he struck her three times with an axe, inflicting serious wounds but not killing her.

HOLLOWAY'S OINTMENT.—Scald Heads, Sore Breasts, Infamed Nipples.—There is no medical preparation in the world which may be so thoroughly depended on in the treatment of the above ailment as Holloway's invaluable Ointment, and scarcely a day passes in which authentic testimonials to its extraordinary efficacy are not received from all parts of the globe. Nothing can be simpler or more safe than the manner in which they are applied, or its action on the body both locally and constitutionally. The Ointment rubs on the part affected enter the pores just as salt enters meat, and not only gets rid of the local evil, but penetrates to the source of it, and drives it from the system.

BRONCHITIS.—The usual symptoms of this disease are Cough, Soreness of the Lungs or Throat, Hoarseness, Difficulty of Breathing, Hectic Fever, a spitting up of Phlegm or mucus and sometimes Blood. It is an inflammation of the fine skin which lines the inside of the whole of the Wind Tubes or Air Vessels which run through every part of the Lungs. Jayne's Expectorant immediately suppresses the Cough, Pain, Inflammation, Fever and difficulty of Breathing; produces a free and easy expectoration, and effects a speedy cure.

Sold by CURTIS & MOORE and Langley Bros., Victoria.

If BROWN'S BRONCHIAL TROCHES are among the acknowledged institutions of the land. What would our ministers, our lecturers, our lawyers, do without these invaluable "Troches?" To what an amount of "aehms" and coughs and throat clearings would we be all subjected, were it not for those all-powerful and soothing lozenges? We have tried them and they did us good.—N. W. Waverly.

MISCELLANEOUS.

Ex "Prince of the Seas." AND OTHER LATE ARRIVALS.

HENRY NATHAN,

OFFERS FOR SALE

BLANKETS, 21-2 & 3 points.

CLOTHING—Velvet coats, fine black cloth frock coats, doeskin, cheviot and flannel suits, ribbed dress pants, tweed coats and pants, shooting coats, felling jackets, Maccles, etc., heavy muslin, cloth and tweed overshirts, felt, oilskin hats, cloth caps, &c., black mohair and fancy silk jackets, woolen neckties and comforters.

ROYAL MAIL

Steam Packet

Company's Agency,

For British Columbia & Van-

couver Island.

OFFICE, MACDONALD & CO., BANKERS,

Yates Street.

THE ATTENTION OF SHIPPERS

and passengers is respectfully solicited to the

superior facilities the Royal Mail Steam Packet Com-

pany's Line affords, for the speedy conveyance of

Treasure, Goods and Passengers to and from England

to British Columbia and Vancouver Island, in con-

nection with the Pacific Mail Steamship Com-

pany's Vessels and the Panama Railroad.

The superiority of the accommodation and ser-

vice on board the Royal Mail Steamers, together

with the time occupied in the passage between Eng-

land and Aspinwall, Street being so much shorter

than any other route, and the moderate rate of

passage money, render this Company's steamers the

CHEAPEST AND MOST EXPEDITIOUS MEANS

OF TRANSIT, for passengers or for the forwarding of

Goods and Treasure from Aspinwall to Europe.

Under an arrangement with the PACIFIC MAIL

STEAMSHIP CO., Specie and Bullion can be con-

veyed to London and Havre in France, covered by

insurance, for delivery to the Agent of the Royal

Mail Steam Packet Company at Panama.

An arrangement also exists for the transmission by Express to and from A-pivall, or measurement goods, Jewellery and plate. The Royal Mail will avail itself of every advantage to instruct their agents in the trade with Panama, without the loss of time, and to those concerned in the trade with Havana, the facilities afforded by the Royal Mail Steam Packet Company's Steamers in conveying Merchandise, such as Cigars, &c., through to Panama, without the necessity of the intervention of an Agent, is especially convenient. Arrangements can be made for the shipment of Gold, Silver and Copper Ores, Furs, &c., to Europe from Aspinwall, by the Company's steamers, on favorable terms.

Further information on the subject of Freight, Passage Money, and the general arrangement of the Company, will be furnished by the undersigned.

Thursday Morning, Feb. 20, 1862.

Will Victoria be Incorporated next Session?

The sudden growth of population in June, July and August, 1858, first raised the question of the incorporation of Victoria. "Old settlers" discussed the propriety of it, and concurred with the "new-comers" that it was very desirable. Even the Assembly of that "venerable period" informally referred to the question with no jealous eye. After the excitement of the summer died away we revived the idea during the winter months of '58-9. In the fall of '59, when the army of patriots pushed their heads above the level of their fellows as candidates for legislative honors, everything in general was promised, and the incorporation of Victoria in particular. None of the candidates—whether from town or country—were so eloquent or impressive as the two gentlemen who represent Victoria—no, who hold the seats of town representatives in the Assembly. Mr. Franklin, from the recollections of a former period and of the old country, thought that the high-sounding titles of "Mayor, Aldermen, and Common Councilors"—an aping of "Queen, Lords, and Commons"—was an indispensable. Of course, such a galaxy of titles would spread the town's importance amazingly. A less showy, less cumbersome, and a more inexpensive form of city government, such as a President and Trustees, was neither good taste nor good policy—there was nothing, in the worthy candidate's opinion, like copying the venerable and illustrious precedent set by the Italian cities, but copied and improved by London. Many people really thought Mr. Franklin in earnest. Was not that strange, when we consider how forgotten he has been since?

But his illustrious colleague—without whom he said and others said "neither Government nor Assembly nor country could get along were he not elected"—an idea long since exploded—but the favorite pupil of Sir Hugh Cairns even excelled all others, so lavish was he in promises of incorporation. England, Canada, and San Francisco were to be searched for the latest civic institutions. Though the pupil of Cairns and the disciple of Bentham, his capacious intellect could not trust the future of Victoria to any home-made inventions of civic machinery. But out of the experience of the universal Anglo-Saxon people, the constituency before whom he plead to be elected, were to be endowed with civic machinery that would work like a charm—so well, indeed, that civic taxes would be admired by the hirsute gender like juveniles do sugar-candy. Electors—the two hundred and thirty—were told by Mr. Cary, that if Gov. Douglas would not willingly assent to incorporation, if they elected him, he would literally scare an Act of Incorporation out of the Executive. Such talent and such numbers no Governor dare oppose—in short, that Victoria would be incorporated before the spring of 1860. As a matter of course, such loud and earnest protestations were believed in. But do they not contrast very unfavorably with the non-incorporation of the town.

Two opening speeches have talked eloquently of an Act of Incorporation as a Government measure—that is, literally translated from history, a government dodge—promise externally and never perform. Two sessions of the Assembly have transpired, and two in corporators on Bills have been introduced, and a third refused. After spitting fire at each other from opposite sides of the House about the first Government bill—the perfection of abortions—the majority, headed by the town member, refused to the minority the passage of a decent incorporation Bill, and even refused to enact their own bantling into law. Whether the latter was in consequence of the unfavorable opinion which the Obstructives entertained of the concentrated essence of all the experience of all the Anglo-Saxon family, or whether—as was probably the case—it was owing to the session being "played out"—at any rate the incorporation dodge bumbozled the town completely. We certainly give the town members great praise in this matter, (though they could have passed the bill any time they liked,) for they really did the business like professional Jeremy Diddlers.

The last session—which ended the other day, and which is still fresh in the memory—not through what was done, but what was left undone—the last session, like its immediate predecessor, tried its experienced—of course experienced—hand in tinkering at another incorporation bill. But this time the deformities conceived for civic machinery were the result of design—not of ignorance, as formerly. So clever in deception had the parental advocates of incorporation become, that they dangled their paper gorilla about till the session was "played out" again; when, of course, each branch of Government, thankful for their two years' immunity from the fulfilment of their promises, puckered up their lips to promise that the town should be incorporated, most certainly, next session.

When next session arrives the attempt to

act the incorporation pantomime over again with several new touches will, no doubt, be made again. The town members and other kindred spirits will, no doubt, act leading parts true to life and the last chapters of political history. The different branches of Government having rehearsed the plot several times to bamboozle the town out of a simple and inexpensive mode of managing its own affairs, will, of course, pass the blame from one to another to lighten the weight on certain members' shoulders, in order, no doubt, to play off the promise of incorporation at the general election. But it won't do. The game is up. The town knows well enough that it is not from any anxiety to avoid the imposition of civic taxes that incorporation is withheld. The town knows that another voice—official voice—would be heard. That is the stumbling-block. So if the town wants to be incorporated next session, they will have to bring to bear such an outside pressure as will make Government do it.

A WONDERFUL LOCK.—There is now in course of manufacture at Woverhampton a new patent keyless lock, having 244,149,625 combinations. The lock is the invention of Count Kersolon, a Frenchman, but it is now the property in this country of a Mr. Lloysell. It has five rollers, and each roller is marked with 25 letters of the alphabet. If the letter at which it is set should not be discovered, the exhausting of all the variations necessary in that case to the opening of the lock would require an immense expenditure of time. It is intended to place one of these locks upon some iron safes that are being made for exhibition at the forthcoming World's Fair. In one of the safes it is proposed to place the sum of £500, which is to fall to the lot of the person who may be fortunate enough to effect an opening of the safe.

ED. The Halifax (Nova Scotia) Sun justified the taking of Mason and Shidell from the British mail steamer Trent, and argued that the act was strictly in accordance with the laws of nations. It also published a long communication from James Whitman, who takes the same ground.

THE FRENCH DEFICIT.—The deficit in the French finance appears to increase under scrutiny. It is now asserted to be fifty-four millions sterling, instead of forty millions, as stated by M. Fould.

WAR RISKS FOR SHIPPING.—In London an association of shipowners is formed, for the purpose of insuring British ships against war risks.

NEW ADVERTISEMENTS

WANTED.
CONTRACT LABOR WANTED FOR
trenching ground and clearing land of oak
scrub. Apply to

MR. CARY,
Government street.

Plunger for Sale.

THE PLUNGER ("LADY FRANKLIN," 104 tons register, 5 months old, well fitted and in sailing order, now lying near Stevens' Steam Mill, James Bay, will be sold at a bargain if application be made immediately at the Victoria Hotel, Government street.

PHOENIX SALOON

ESTABLISHED IN 1858.

The Mining Laws Again.

EDITOR BRITISH COLONIST.—The result of the miner's meeting on Thursday evening last, and the manner in which it was conducted, has been so severely commented on that it seems quite proper for some one to come forth and make answer. I do not believe this to be necessary for the purpose of disabusing the minds of the Victorians,—whether they be sojourners or citizens—as I am entirely satisfied that they, with few exceptions, cordially endorse the proceedings of said meeting and will appreciate the intentions of those who are so sadly disappointed with the result. There are others, however, who are residing in the interior, and are all more or less interested in mining operations, who may receive a wrong impression from the articles which appeared in the *Press* of the 14th and 15th inst., from "Has mined and may mine again." If he had told the whole story, he would have saved us the trouble of all this scribbling. I am sorry that the resolutions which sprang up so magically from behind the screen did not meet with my friend's approval. They did, however, meet with the unanimous approval of the meeting, and such bursts of applause as the preamble and resolutions called forth, satisfied me that they were just what the miners wanted, and the citizens concurred. He's a mighty smartman, "Mr. Has Mined," who knows more than Moore's half-packed full of intelligent and enterprising miners and citizens, and I think if you just reason the matter over calmly in your own mind you must arrive at the same conclusion.

As regards the grave charge of many at the meeting being foreigners, I shall say nothing. It is true, still, that at least, must be borne, as most of the good British subjects seem to think them no serious incumbrance to the colony. His Excellency gives them the same voice in making mining laws as British subjects, and it really seems to me that "Mr. Has Mined" comes nearer violating the law when he infers that miners who are foreigners shall be muzzled, than anything in the preamble or the resolutions, as that privilege certainly is the law of the colony by proclamation from the Governor.

The assertion that discussion was prohibited I most emphatically deny. It is true the boys did not seem inclined to hear what the Major had to say; but that was before the meeting was organized. The resolutions which were read were open to discussion, and ample time was given for any gentleman to speak or offer amendments. No one came forward or attempted to do so. I do not believe that any attempt would have been made to choke down any person who might have attempted to speak. It is quite probable, however, if the speech had not met with the views of the boys, that they might have neglected to applaud the orator, or perhaps have stopped their ears, or gave vent to a few hisses; but these are privileges which all popular assemblies will take. I am satisfied that the gentleman, whoever he might have been, would have been patiently heard. Every man whom I spoke with during the afternoon preceding the meeting, expressed opinions favoring a free discussion.

I do not pretend that the mining laws are perfect. There doubtless should and will be some additional legislation to meet the requirements of tunnel claims; but I do believe that Victoria is not the proper place to pass mining laws. Any town in British Columbia has the same right to pass mining laws for the Cariboo District that Victoria has; and should so unsafe a policy be adopted, is it not probable that other laws may be passed either at Westminster, Douglas, Yale, Lytton, Lillooet, Beaver Lake, or Forks of Quesnel, where, at either place, large numbers of miners may be found passing the winter, that would conflict in their operations and privileges in the most important and vital points?

The absurdity of styling Victoria the headquarters of all Cariboo miners, and constraining their absence as a criminal negligence of their own business, and therefore taking judgment by default, is the most glaring attempt at rapine and plunder that has ever come to my notice, and then in the very next sentence to accord the same privilege to the towns in British Columbia that the meeting of last Thursday would most assuredly have deprived them of had any mining laws been passed, establishes a clear case of insanity.

I agree with the gentleman when he says that Victoria, together with all the towns in B. C., are deeply interested in the successful prosecution of mining operations in the Cariboo District, and consequently proportionately interested in the mining laws, and I would fain extend that right to them all; but how does my insane friend propose to extend these inherent rights? Why, by calling a miners' meeting in Victoria when the whole country from Westminster to the Forks of Quesnel is locked up with ice and blocked up with snow. But suppose this was not the case, suppose the rivers and lakes were all open and the trails in good condition; and, suppose further, that this notice had been given calling a miners' meeting two months ago, what justice, I ask of any reasonable being, would there be in dragging the miners, who are scattered from the base of the Rocky Mountains to the city of Victoria, a distance of 600 miles, to make laws and regulations to govern them in those distant regions. Hundreds of miners within my own knowledge who toiled the entire season—some without finding a good claim at all, others barely obtaining an assurance that their privations and hardships would be rewarded the coming season—are men dispersed along the route from this place to Cariboo engaged in every description of employment to earn an honest subsistence until the warm weather shall disperse the enemy that compelled their retreat last October. They have not the funds to come down with, or to carry them back. All those whose toil, in common with that of the more fortunate, has developed the vast resources of British Columbia are by this process to be disfranchised. Have the miners who are now passing the winter here any voice in making laws for the government of Victoria, provided even they are competent voters, unless the election happens to come off during their stay? or do they ask any such privilege? No, sir, we profess to be reasonable men, and no reasonable man will ask for any unreasonable or inconsistent favors. All the towns of British Columbia and Vancouver Island will be represented in the Cariboo district the coming season, and, as a consequence, will all be competent voters in framing mining laws, and much better able to judge as to what the requirements of Cariboo are than those who have never visited the mines.

As to the resolutions being prepared and written out before the meeting was held, it is quite true that such was the case. A number of resolutions were in the pockets of more than one miner to be submitted to the meeting, and I am unable to conceive how the spirit or justice of a resolution can be altered or in any way effected by the particular time or place in which they were written. It is all very good for our disaffected friends to say that they had no preamble or resolution in their pockets which they were deterred from presenting by the unmistakable expression of the meeting—we all know to the contrary.

I would say one word more in relation to the slur that has been cast upon foreigners: Who, allow me to ask, penetrates into the inhospitable regions of the Cariboo country and by their indefatigable perseverance discovers the immense wealth of the Cariboo mines? Who traversed the country from the Forks of Quesnel to Astoria on snowshoes and packed from 50 to 100 pounds on their backs on which to subsist until proper explorations could be made? Nine out of ten, I answer, were foreigners. Give these foreigners their dues; fulfil to them your promises, and my word for it, they will give you no cause to regret the liberal privileges you have awarded them.

ONE OF THE COMMITTEE OF SEVEN.

DISCHARGED.—The colored man Harrison, accused of stealing \$90 from a clockman, was yesterday discharged from custody by the Police Magistrate, the evidence adduced being deemed insufficient to warrant a conviction.

REDUCTION IN COURT FEES.—A petition to the Chief Justice, from the barristers and solicitors of this Colony, having for its object a reduction in the Supreme Court fees, is being prepared.

ICE.—Formed to the thickness of three inches on Wednesday night.

DISCHARGING.—The schooner Tolo discharged cargo yesterday morning on the Hudson Bay Co.'s Wharf.

Mr. McCrea will hold an auction sale at 11 o'clock this morning.

BIRTH.

In this city, February 18th, the wife of James Langley, Esq., of a son.

REDUCTION IN COURT FEES.—A petition to the Chief Justice, from the barristers and solicitors of this Colony, having for its object a reduction in the Supreme Court fees, is being prepared.

THE BRITISH COLONIST.—The result of the miner's meeting on Thursday evening last, and the manner in which it was conducted, has been so severely commented on that it seems quite proper for some one to come forth and make answer. I do not believe this to be necessary for the purpose of disabusing the minds of the Victorians,—whether they be sojourners or citizens—as I am entirely satisfied that they, with few exceptions, cordially endorse the proceedings of said meeting and will appreciate the intentions of those who are so sadly disappointed with the result. There are others, however, who are residing in the interior, and are all more or less interested in mining operations, who may receive a wrong impression from the articles which appeared in the *Press* of the 14th and 15th inst., from "Has mined and may mine again." If he had told the whole story, he would have saved us the trouble of all this scribbling. I am sorry that the resolutions which sprang up so magically from behind the screen did not meet with my friend's approval. They did, however, meet with the unanimous approval of the meeting, and such bursts of applause as the preamble and resolutions called forth, satisfied me that they were just what the miners wanted, and the citizens concurred. He's a mighty smartman, "Mr. Has Mined," who knows more than Moore's half-packed full of intelligent and enterprising miners and citizens, and I think if you just reason the matter over calmly in your own mind you must arrive at the same conclusion.

As regards the grave charge of many at the meeting being foreigners, I shall say nothing. It is true, still, that at least, must be borne, as most of the good British subjects seem to think them no serious incumbrance to the colony. His Excellency gives them the same voice in making mining laws as British subjects, and it really seems to me that "Mr. Has Mined" comes nearer violating the law when he infers that miners who are foreigners shall be muzzled, than anything in the preamble or the resolutions, as that privilege certainly is the law of the colony by proclamation from the Governor.

The assertion that discussion was prohibited I most emphatically deny. It is true the boys did not seem inclined to hear what the Major had to say; but that was before the meeting was organized. The resolutions which were read were open to discussion, and ample time was given for any gentleman to speak or offer amendments. No one came forward or attempted to do so. I do not believe that any attempt would have been made to choke down any person who might have attempted to speak. It is quite probable, however, if the speech had not met with the views of the boys, that they might have neglected to applaud the orator, or perhaps have stopped their ears, or gave vent to a few hisses; but these are privileges which all popular assemblies will take. I am satisfied that the gentleman, whoever he might have been, would have been patiently heard. Every man whom I spoke with during the afternoon preceding the meeting, expressed opinions favoring a free discussion.

I do not pretend that the mining laws are perfect. There doubtless should and will be some additional legislation to meet the requirements of tunnel claims; but I do believe that Victoria is not the proper place to pass mining laws. Any town in British Columbia has the same right to pass mining laws for the Cariboo District that Victoria has; and should so unsafe a policy be adopted, is it not probable that other laws may be passed either at Westminster, Douglas, Yale, Lytton, Lillooet, Beaver Lake, or Forks of Quesnel, where, at either place, large numbers of miners may be found passing the winter, that would conflict in their operations and privileges in the most important and vital points?

The absurdity of styling Victoria the headquarters of all Cariboo miners, and constraining their absence as a criminal negligence of their own business, and therefore taking judgment by default, is the most glaring attempt at rapine and plunder that has ever come to my notice, and then in the very next sentence to accord the same privilege to the towns in British Columbia that the meeting of last Thursday would most assuredly have deprived them of had any mining laws been passed, establishes a clear case of insanity.

I agree with the gentleman when he says that Victoria, together with all the towns in B. C., are deeply interested in the successful prosecution of mining operations in the Cariboo District, and consequently proportionately interested in the mining laws, and I would fain extend that right to them all; but how does my insane friend propose to extend these inherent rights? Why, by calling a miners' meeting in Victoria when the whole country from Westminster to the Forks of Quesnel is locked up with ice and blocked up with snow. But suppose this was not the case, suppose the rivers and lakes were all open and the trails in good condition; and, suppose further, that this notice had been given calling a miners' meeting two months ago, what justice, I ask of any reasonable being, would there be in dragging the miners, who are scattered from the base of the Rocky Mountains to the city of Victoria, a distance of 600 miles, to make laws and regulations to govern them in those distant regions. Hundreds of miners within my own knowledge who toiled the entire season—some without finding a good claim at all, others barely obtaining an assurance that their privations and hardships would be rewarded the coming season—are men dispersed along the route from this place to Cariboo engaged in every description of employment to earn an honest subsistence until the warm weather shall disperse the enemy that compelled their retreat last October. MISCELLANEOUS.

THE WORLD'S FRIEND!
Holloway's Ointment.

A Cure for Piles and Fistulas.

Inflammation of sensitive parts, piles, fistulas, and such like painful diseases may be presently relieved, and ultimately cured, by the proper and diligent use of this ointment and healing Ointment, whose action should, in such cases, be assisted by judicious doses of Pills; or many days have elapsed the anxious patient will experience a wonderful degree of ease from this treatment. They are equally suitable to both sexes, and all ages.

Coughs, Colds, and Asthma.

These complaints of the chest come on with alarming frequency. The Ointment should suitably be rubbed on, twice a day on the chest and between the shoulders, when the violence of all symptoms will gradually give way, the breathing become longer, and the oppression less. No medicines are more efficient in chest complaints, none can be used with equal safety and certainty. Both Pills and Ointment are accompanied by very clear and simple directions for using them.

A Man who refus'd to have his Leg off.

"From the Kilkish Advertiser, June 2nd, 1860."

BENJAMIN COX, Esquire, Magistrate, said in the Board Room at Kilkish, that he knew a man who had been in the Infirmary and was actually turned out as incurable, on his way home to Kilkish, he purchased at Ennis, Holloway's Pills and Ointment, for, as he said, it could not be worse with him. The man, said Mr. Cox, became by their use as sound and as healthy as any man in the room. These celebrated Pills and Ointment will cure any wound, sore, or ulcer, however long standing, if properly used according to the printed directions.

Gout and Rheumatism.

The essence of these diseases lie in the blood, which has, floating through each vessel, the pain-giving poison, which irritates and inflames every tissue it comes in contact with, and produces the hot, swollen, elastic enlargement about the joints so characteristic of gouty diseases. The philosophy of cure consists in overcoming this depravity in the blood, which is rapidly purified by the use of the Pills. The Ointment, when rubbed upon the skin, penetrates the system through the pores, acts in unison with the Pills, and soon effects a cure.

Dropwort, Swollen Legs or Ankles.

The various kinds of dropstyes, whether windy or watery, arise from some obstruction to the free circulation through the blood vessels or lymphatics, or depend on the inflamed state of some secreting surface. Holloway's remedies, of which the efficacy cannot be exaggerated, act directly upon the blood, the absorbents and secretions, with a power that no dropsy, however inveterate, can long resist. They regulate the proper flow of blood to every organ, and purify it likewise—they filter out everything that is bad or injurious—they thoroughly renew every function, yet potent as they are for good, they are powerless for evil. They do not contain mercury or any noxious substances. They act safely and certainly.

Bad Legs, Bad Breasts, and Old Ulcers.

This invaluable Ointment was never known to fail in the cure of any wound, any sore, or any ulcer—as can be proved by innumerable testimonials from persons who had been discharged from Hospitals as incurable, and yet by perseverance they have been made as sound as they were the day they were born, by this incomparable Ointment. For pimples, blotches, scald heads, and scrotic humours, it is equally efficacious.

Both the Ointment and Pills should be used in the following cases:

Bad Legs	Chilblains	Fistulas	Skin-diseases
Bad Breasts	Chapped Hands	Gout	Swelling
Burns	Concretes	Ulcers	Sore-heads
Bunions	Lumbago	Tumours	
Blow of Mosquitoes	Contracted and	Piles	
Scald-Flies and Sand-Flies	Stif-Joints	Rheuma-	Wounds
Cocca-bay Scabs	Elephantiasis	tis	Yaws
		Sore Nipple,	

There is a considerable saving by taking the larger sizes.

N. B.—Directions for the guidance of patients in every disorder are affixed to each Pot.

JAYNE'S EXPECTORANT.

Thirty years of experience has demonstrated beyond the shadow of a doubt, that JAYNE'S EXPECTORANT exceeds every other remedy for the cure of

ASTHMA.

BRONCHITIS.

CONSUMPTION.

COUGHS AND COLDS.

CROUP AND WHOOPING COUGH.

SPITTING OF BLOOD.

AND ALL PULMONARY COMPLAINTS.

While many other Remedies have been landed and extolled, and achieved a temporary reputation, JAYNE'S EXPECTORANT has continually increased in popularity until now there is scarcely an inhabitable part of the globe where it is not used and highly appreciated. The following are a few of the many Certificates received:

Rev. VALENTINE GRAY, of the Methodist Church, writes from Centerville, Pa.

Having experienced the beneficial effects of your Family Medicines, I would give it as my opinion that they are the very best I ever had occasion to use, and most cheerfully recommend them to the afflicted. Your EXPECTORANT especially I have found to be a sure cure for COUGHS and COLDS.

Dr. W. W. WINTER, of Millidgeville, Ill., writes:

It is with great pleasure that I can recommend your EXPECTORANT to those suffering from Bronchial Aductions, having used it with the most satisfactory results.

Mr. NATHAN PENNYPACKER, of Upper Uwhiand, Chester county, Pa., says:

Having been afflicted with ASTHMA and BRONCHITIS, and the treatment of several skillful physicians proving of no avail, I commenced the use of your EXPECTORANT. After taking it for about three months I found myself entirely cured.

Rev. JOHN DOWLING, D. D., Pastor of the Berean Baptist Church, N. Y., writes:

I have long known the virtues of your EXPECTORANT, and frequently tested them myself and family, when afflicted with COUGHS and COLDS. I believe it to be one of the best remedies ever discovered for these maladies.

Mr. READING, D. T., of Twenty Mile Stand, Warren County, Ohio, says:

Recently I had an attack of ASTHMA—the most distressing of all diseases, and yesterday afternoon, after taking a short ride, returned home unable to breathe. Then came the prostration of my wife. I was led to try your EXPECTORANT. The first dose gave instant relief, and after the fourth dose I enjoyed a refreshing sleep, and the next morning arose in better health than for two years past.

Rev. J. J. WALSH, Missionary of the Presb. Board at Madras, Northern India, says:

Your EXPECTORANT was the means under Providence of saving a case of INCIPENT CONSUMPTION, which had been pronounced incurable by competent medical men.

MAURICE SCHWARZ, of Concord, Wis., says:

When the WHOOPING COUGH prevailed to some extent at our place, this disease seemed to baffle our physicians. In various cases the EXPECTORANT was used, and it did not fail to cure.

JOHN NARIMAN, Esq., of Stewartstown, N. H., writes:

Not long since, a child of mine had a very violent and distressing attack of CROUP, which must have proved fatal had not immediate and constant attention been given to it. The EXPECTORANT, and within three-quarters of an hour the child had taken six teaspoonfuls, satisfied with perfect ease, a cure within that time having been effected.

Rev. RUFUS BARBOUR, D. D., formerly President of Water-vile College, Maine, writes:

For more than a year I have recommended Dr. JAYNE'S FAMILY MEDICINES, and especially the EXPECTORANT. I know that these medicines are highly esteemed and frequently prescribed by some of the most respectable of the regular practitioners of medicine; and I do not hesitate to commend them as a valuable addition to our materia medica, and as safe as well as eminently beneficial remedy for the diseased.

DAN TURNER, of Cassville, Huntingdon county, Penn., writes:

My son, aged nineteen years, was confined to his bed for three months, his disease being pronounced by the attending physician to be CONSUMPTION. Failing to obtain any relief from the use of your EXPECTORANT, and through its use he has been entirely restored to health.

JOHN HENRY, of Burlington, Bradford county, Pennsylvania, says:

For two years, my son was afflicted with a disease resembling CONSUMPTION, and during this period was unable to leave home. Being finally induced to try your EXPECTORANT, he was completely cured after taking ten bottles, and he is now able to work every day.

M. PRESTON EWING, Lacourte, Harrison county, Indiana, writes:

Being afflicted with BRONCHITIS for the space of three years, to such an extent that I was obliged to relinquish the teaching of Vocal Music, and failing to obtain any relief from the use of your EXPECTORANT, and through its use he has been completely cured after taking ten bottles, and he is now able to work every day.

THIS EXPECTORANT, and all of DR. JAYNE'S FAMILY MEDICINES, are sold by CURTIS & MOORE and LANGLEY BROS., Victoria, from whom may also be obtained gratis, Jayne's Medical Almanac and Guide to Health.
